Contents

Canvaro

Tried and tested, high-performance and always at the right height. Equipped with electric or manual height adjustment for a simple switch between seated and standing work positions.

Quick and quiet adjustment to the right working height

The variant with a powerful and quiet electric motor (less than 45 dBA) moves at 50 mm per second to reach the preferred working height in no time.

Flexible uses

Canvaro delivers the right solution for any requirement. Whether as a highly functional and ergonomic single, double or group workspace.

Electric height adjustment

Easy switch between a standing and seated work position.

Smart workspace connectivity

The Applica docking system is available as an optional extra for the Canvaro desks. The innovative cable management system provides a broad range of options for connecting the data network and power supply.

Ports and cable management
The Applica docking system comes with individually assignable ports for all kinds of mobile devices to ensure neat cable management.

USB, VGA, RJ45

Schuko socket / mains switch

For individual requirements

A large range of accessories and add-ons such as the Pontis technical container, the sound-absorbing Viteco privacy and partition walls or the Flexter organisation rail accommodate almost any conceivable requirement for individual workspaces.

Perfectly organised: With the Flexter organisation rail

Working in peace: Viteco partition walls for improved room acoustics

Incredible variety

The full and varied selection of surfaces and colours enable individual planning and furnishing, along with numerous design options.

Hygiene shield for infection control

The Canvaro desk system is optionally available with Viteco hygiene screen made of high-quality acrylic glass, making a valuable contribution to required hygiene protection measures in the workspace.

Manual height-adjustment

The height of the table top can be adjusted individually to suit the particular user.

*The mode of height adjustment depends on the frame variant (round or square tube).

Stylish levers*
Tension levers are used to adjust the table height entirely without tools. The levers are delivered in the frame colour. Optionally available with gas spring operation.

Allen key*
Individual adjustment of the table height by Allen key.

Height-adjustment crank*
The working height is adjusted using a crank, which is then tucked away beneath the table top.
